EDUCATION

New Jersey Institute of Technology

Newark, NJ

Bachelor of Science in Information Technology — Web and Software Development

Sep 2022 – May 2026

- **Relevant Coursework:** Advanced Programming for IT, Database Design & Management, Computer Systems Security, System Administration, Systems Integration, IT Capstone Project, Computer Systems & Networks

WORK EXPERIENCE

New Jersey Courts

Trenton, NJ

Software Engineer

Jun 2025 – Present

- Architected a complete **Maintenance** module using **JSF** and **Java**, enabling authorized users to add, modify, and manage **100+** system-critical lookup tables through confirmation-based workflows and managed beans.
- Implemented **role-based access control** for administrative features by integrating session-scoped permission checks across **JSF** managed beans, restricting sensitive screens to authorized judiciary staff.
- Built **environment-specific feature toggling** using property files to gate administrative tools by environment (DEV/QA vs. PROD), preventing exposure of testing interfaces in production.
- Developed an **audit logging system** that captures user IDs, timestamps, and before/after data states for all code table modifications, supporting traceability and compliance requirements.
- Enhanced the **Judgement of Conviction (JOC)** application with updated penalty logic to reflect new state regulations, ensuring **100% compliance** with legislative changes.
- Traced and optimized **DAO-EJB call flows** for operations, adding logging to pinpoint bottlenecks and reducing ambiguity in database insertion and retrieval error diagnosis.

PROJECTS

Coursify | www.coursify1.com

Apr 2025 – Jun 2025

- Built an AI-powered scheduling platform (**React**, **Spring Boot**, **MySQL**) that generates personalized course plans, deployed and tested with active student users.
- Deployed a lightweight intrusion detection layer to flag and block malicious requests, reducing abnormal traffic and mitigating unauthorized access attempts.
- Migrated the database from **Google Cloud SQL** to a self-hosted server, reducing infrastructure costs by **97%** while maintaining consistent uptime.

Taste Of Worlds | <https://github.com/Ismail-Shaikh03/Taste-of-Worlds>

Dec 2024 – Jan 2025

- Developed a recipe discovery web app (**Node.js**, **Express.js**, **MySQL**) with a catalog of **500+** items and optimized search indexing for fast query response.
- Designed and deployed **RESTful APIs** on **AWS EC2** to handle full CRUD operations for recipe and user data.
- Hardened security by configuring **EC2 Security Groups** and scoped MySQL permissions to enforce least-privilege access for all accounts.

LEADERSHIP & ACTIVITIES

Bangladeshi Student Association (BSA)

Newark, NJ

Student Advertiser

Sep 2022 – May 2026

- Coordinated digital and physical advertising for cultural events and campus festivals, supporting outreach for **5+** major events annually.
- Collaborated with the executive board on event logistics and communications strategy across semesters.

TECHNICAL SKILLS

Programming: Java (J2EE), Python, SQL (DB2, MySQL, PostgreSQL), JavaScript, HTML5, CSS3, PHP

Frameworks: JSF, Spring Boot, React, Node.js, Express.js, RESTful API Development

Tools: AWS (EC2), IBM RSA, WebSphere, Git, VMware, VS Code

LICENSES & CERTIFICATIONS

Cisco Certified: **Python** Essentials 1 | Introduction to **Cybersecurity**
